## ONLINE MANAGEMENT PROGRAM MSDS

U.S. Compliance offers an online MSDS management service to clients who wish to centralize their MSDS forms and access them efficiently when necessary. Some benefits you will receive from a centrally managed MSDS program include:

- Spending Less Time locating MSDS's
- Saving time and money spent managing your MSDS's on site
- Centralized storage for better security and control
- Gain access through a simple login procedure
- Maintaining OSHA compliance by having the most current MSDS's readily available
- Pro-active management of your chemical inventory
- Quick MSDS retrieval through simple searches like chemical name, manufacturer, version date etc.
- 24 Hour Medical/Fire/Spill Emergency Hotline assistance 7 days a week, 365 days a year
  - Our service provider operates an around-the-clock control center to handle chemical emergencies. Technicians will evaluate the chemical emergency, disseminate all necessary information related to evacuation radius, fire fighting procedures, incompatibility with other material involved, personal protective equipment and any additional information needed. Operators will dispatch clean up crews and complete written reports of the incident. In the event of employee exposure to a chemical, our service provider can connect you with toxicologists and doctors who can provide immediate first aid information.
- Print out and organize MSDS books for each specific department within your company
- Electronic MSDS's can be emailed when necessary
- Receive the most current MSDS information available through a constantly updated system

Please call 952-252-3000 with additional questions or features you would like to see in a customized MSDS Management Program for you.
